I. DEGREE PROGRAMS BY HEGIS CATEGORY

PREFACE

"AN INVENTORY OF PROGRAMS IN MARYLAND'S PUBLIC AND PRIVATE COLLEGES AND UNIVERSITIES"

High school graduates have multiple opportunities open to them to continue their education in the State of Maryland. The degree programs -- a series of courses arranged in a scope and sequence which lead to a degree or a certificate -- are designed to meet a wide variety of personal and community needs. This information is indispensable in efforts to project the types of programs required to meet the post-high school needs of the citizens of the State in the decades ahead. The reader will find information on programs in all segments of the tripartite structure -- the Community Colleges, the four-year colleges, and the universities both public and private.

Although the Council prepared this report primarily for its own use, it is aware of the multiple uses to which it may be put. High school counselors should find it helpful in answering some of the questions posed by seniors as they consider the alternatives open to them in furthering their education. Educators throughout the State need to be aware of program developments in all institutions of higher education in order to increase the general effectiveness of educational planning. Finally, state officials use such information as this publication contains in determining the need for new degree programs.

The general spirit of cooperation which has existed between the Council and the institutions in both the public and private sectors greatly facilitated the preparation of this publication. The Council appreciates the prompt response received from the many correspondents in the State's colleges and universities. Continuing cooperation will make possible a periodic updating of the information about programs available in Maryland institutions. All questions having to do with degree programs included herein should be referred to the office(s) of the dean(s) of the institution(s) in which the reader has an interest.
